# Program Goals

---

Learners will have an increase in knowledge about the role of information technology in determining value in healthcare.

---

Learners will have an increase in confidence in utilizing best practice tools and strategies in their professional role.

---

Learners will have an increase in knowledge about information and tools to increase my effectiveness as a healthcare information and management professional.

---

Learners will provide at least one way they will incorporate knowledge gained into their practice.

# Learning Objectives

---

## Develop

a process to design clinical decision support tools based on multidisciplinary collaborative input and feedback to improve patient outcomes and comply with changing quality measures.

---

## Appraise

the enhancements to the Prescription Drug Monitoring Program (PDMP).

---

## Use

an IT Operational Maturity Assessment to become more effective as an IT department.

---

## Review

health information technology related bills of interest for Nebraska Legislature.

---

## Identify

care coordination successes and challenges with the implementation of various Health Information Exchange (HIE) models.

---

## Explore

the value and elements of data governance that define data quality & the role of data stewards.

---

## Program Evaluation

- Complete the evaluation form
