

## **Jennifer Greenman**

### **Chief Information Officer**

Jennifer Greenman is the Chief Information Officer of Cancer Treatment Centers of America® (CTCA). An accomplished health care executive with over fifteen years' experience leading diverse teams in innovative technology solution development, delivery and support, Greenman joined CTCA® in July 2019 from H. Lee Moffitt Cancer Center & Research Institute in Tampa, where she served for five years as Vice President of Information Technology and Chief Information Officer.

In her role at CTCA, Greenman works to implement technology advances and enhancements to empower its internal and external partners with a resilient, responsive and high-performing technology infrastructure to meet the broad needs of the patients and families who come to CTCA for their care.

At Moffitt, Greenman provided leadership and strategic direction for technologies used across the institution, supporting exceptional care delivery and fueling breakthrough scientific discoveries. During her tenure, Moffitt was recognized as a "Best Place to Work in IT" by *Computerworld* from 2017 through 2019. Additionally, Moffitt was recognized by the College of Healthcare Information Management Executives as a "Healthcare Most Wired" organization in 2019, recognized for exemplifying best practices through the adoption, implementation and use of technology. Prior to that, Greenman worked for Tampa's Bayfront Health System in a variety of IT management roles, including Chief Information Officer. She started her career as a Solution Delivery Consultant for Cerner Corporation.

Greenman obtained an MBA from the University of Florida and undergraduate degrees in Management Information Systems and Finance from Florida State University. She is a member of the College of Healthcare Information Management Executives and was recognized by the *Tampa Bay Business Journal* as a finalist for the "CIO of the Year Award" in 2016 and 2018.
