Browse currently validated applications and connect with developers

Join Cerner and explore infinite possibilities innovate at the intersection of health care and information technology. Browse our currently validated applications below and connect with developers. All validated applications have been approved by Cerner Corporation for integration and distribution. Visit our [FAQs page](#) for more information about the validation process.

 <p>Cardiac Risk Cardiac Risk presents relevant patient vitals and lab measurements and the calculated Reynolds Risk Score, along with a succinct, patient-friendly explanation for each result.</p> <p>View App</p>	 <p>Healthwise SMART on FHIR The Healthwise SMART on FHIR app gives organizations a way to easily implement and seamlessly integrate patient education into their Cerner Millennium EHR.</p> <p>View App</p>	 <p>Juxly Timeline Juxly Timeline integrates with PowerChart to display the right information in the right context to help you provide the best possible care. Display a patient's entire record on a single screen. Expand details, filter results, and easily find all of the data you need to easily make fully informed health care recommendations.</p> <p>View App</p>
 <p>Juxly Vault The intuitive interface guides physicians as they identify codes appropriate for their patients. From there, providers can fully document conditions to meet CMS standards quickly and accurately with just a few mouse clicks. Supporting data such as social history, vitals, and lab results are readily accessible, giving providers</p> <p>View App</p>	 <p>Krames on FHIR Krames On FHIR® is a flexible solution suite for physician offices, hospitals, and health systems for delivering patient education materials at the point of care. Using SMART on FHIR® technologies, Krames On FHIR seamlessly integrates directly into the clinician's workflow, enabling them to provide recommended, trusted</p> <p>View App</p>	 <p>Medication Medication® makes understanding how to take medications intuitive and simple, to improve patient health outcomes, as well as healthcare providers' financial performance through enhanced patient experience (HCAHPS scores) and 30-day readmission rate reductions.</p> <p>View App</p>
 <p>Pediatric Growth Chart Pediatric Growth Chart provides a concise, minimal-click, interactive view of a child's growth over time. The application includes traditional growth curve charts, data tables, and a novel parent-facing summary view. Many graphical features assist in communication with the patient and family. Ambulatory and NICU uses are</p> <p>View App</p>	 <p>RxCheck RxCheck is the world's first Prescription Decision Support (PDS) platform. Integrated directly into the prescribing workflow, RxCheck surfaces patient-specific costs, adherence data, and P&T-approved medication protocols.</p> <p>View App</p>	 <p>Surgical Valet ePreop, Inc. offers a wide range of software and workflow tools dedicated to simplifying the surgical experience for patients, RNs, administrators, and physicians. SurgicalValet™ is a modular software suite that places clinicians at the center of the Perioperative Surgical Home (PSH) and drives patient engagement, surgical</p> <p>View App</p>
