

Mia Kaufman, BSN, RN, MBA, is the Sr. Director of Healthcare Informatics/Director of OneChart for Via Christi Health. She is a nurse by trade and has worked with technology for Healthcare organizations for the last 19 years. She has implemented over 13 electronic health record solutions/applications during that time. In her current role she is responsible for supporting, implementing and developing Electronic Health Record (EHR) strategies for the VCH Health System, which includes 9 hospitals and over 30 clinics. Leads the ministry in the strategy, development and implementation of Information Knowledge Management to support clinical practices and clinical applications, collaborating with area leaders on the clinical and administrative decision-making process for the organization. Develops clinical systems strategy in collaboration with members of the Information Technology team and optimizes the use of existing clinical systems for clinicians, physicians, and other multidisciplinary care providers in serving their information management needs. Actively involved in national Ascension councils for informatics strategies and activities. Engaged in national organizations which guide and develop national standards for health informatics and information system strategies. In her role as OneChart Director, she is accountable for supporting the local ministry processes for the Ascension National “OneChart” initiative.
