

# ReportingMD<sup>®</sup>

Analytics for Value-Based Health Care

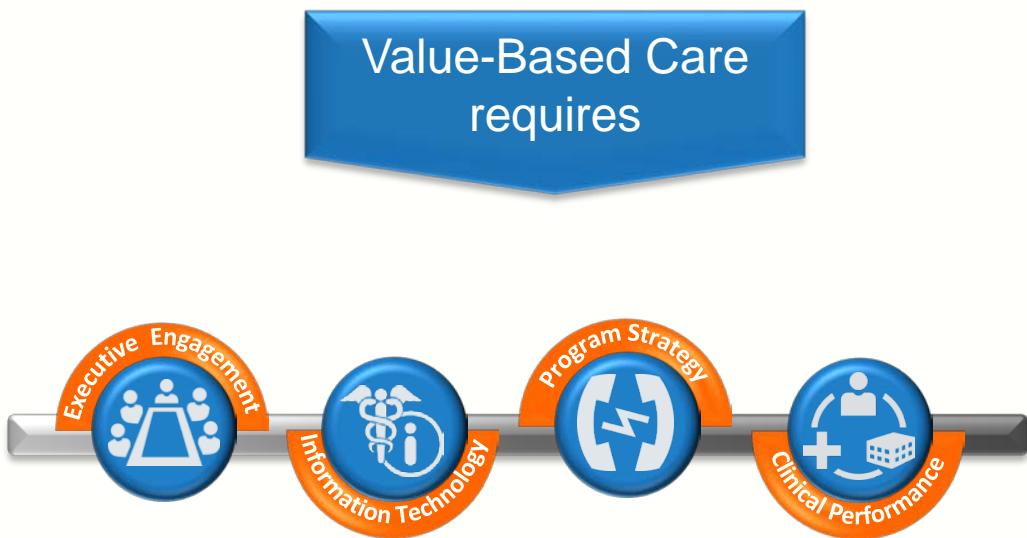

New England HIMSS Conference

**Information Management - Smoothing the Pathway to Value-Based Care**

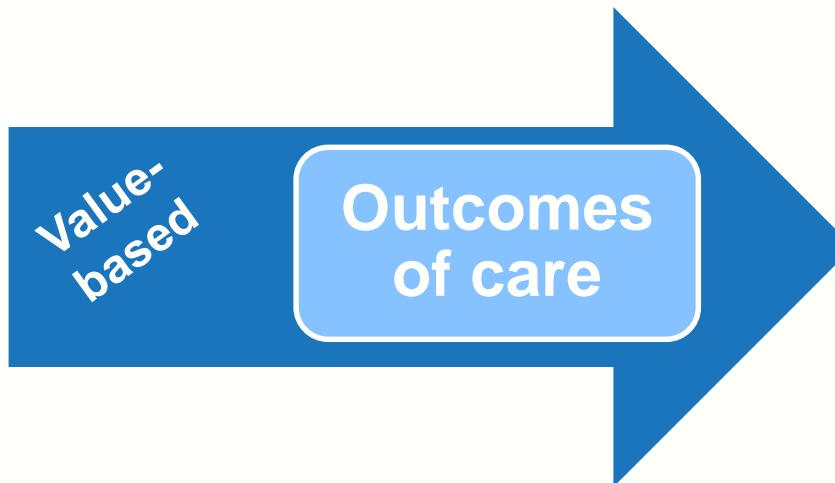

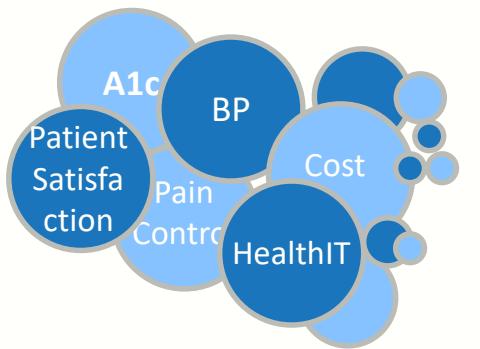

*Presenter: Miranda Stark, MBA*

*ReportingMD Product Manager*

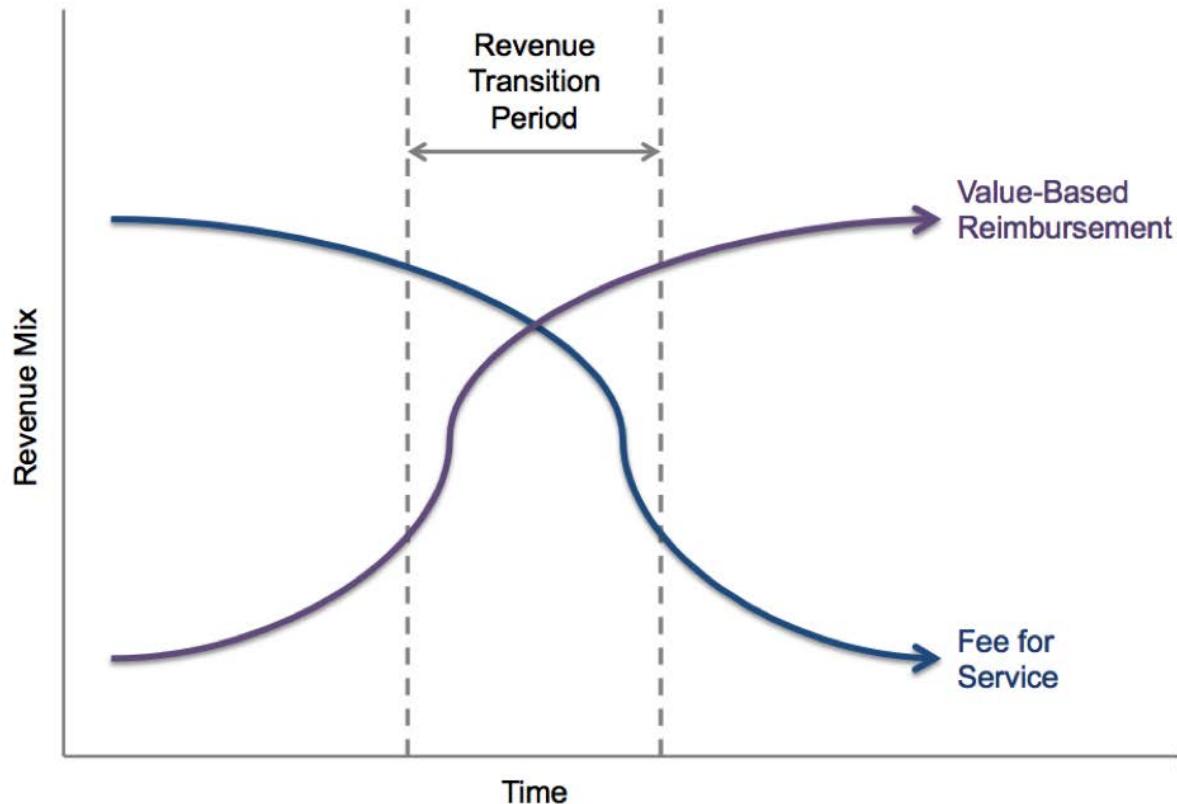

# The Path to Value-Based Care (VBC) is a Team Effort

# Fee-For-Service vs. Value-Based Care

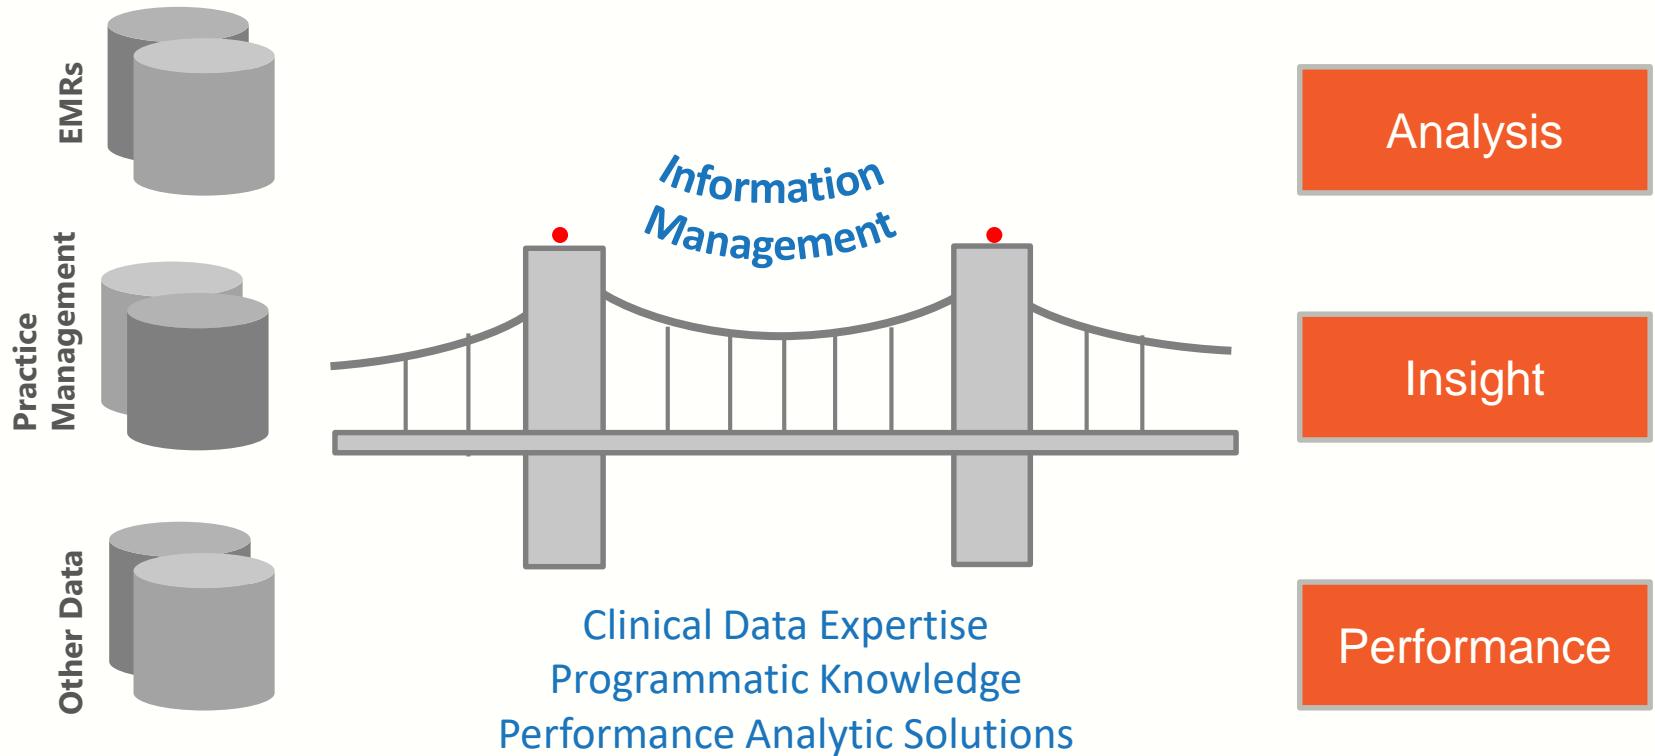

# Market Evolution

Source: Shaygan, Amir, "Landscape Analysis: What Are the Forefronts of Change in the US Hospitals?"

# Bridge the Information Gap

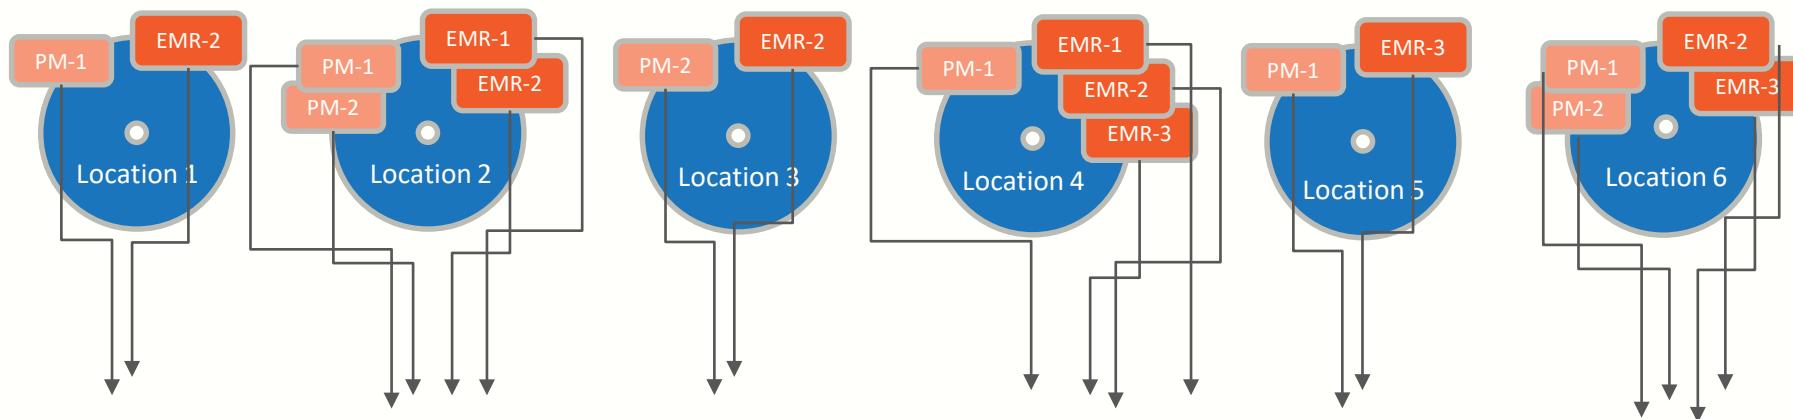

Taking financial risk in value-based care is daunting for organizations

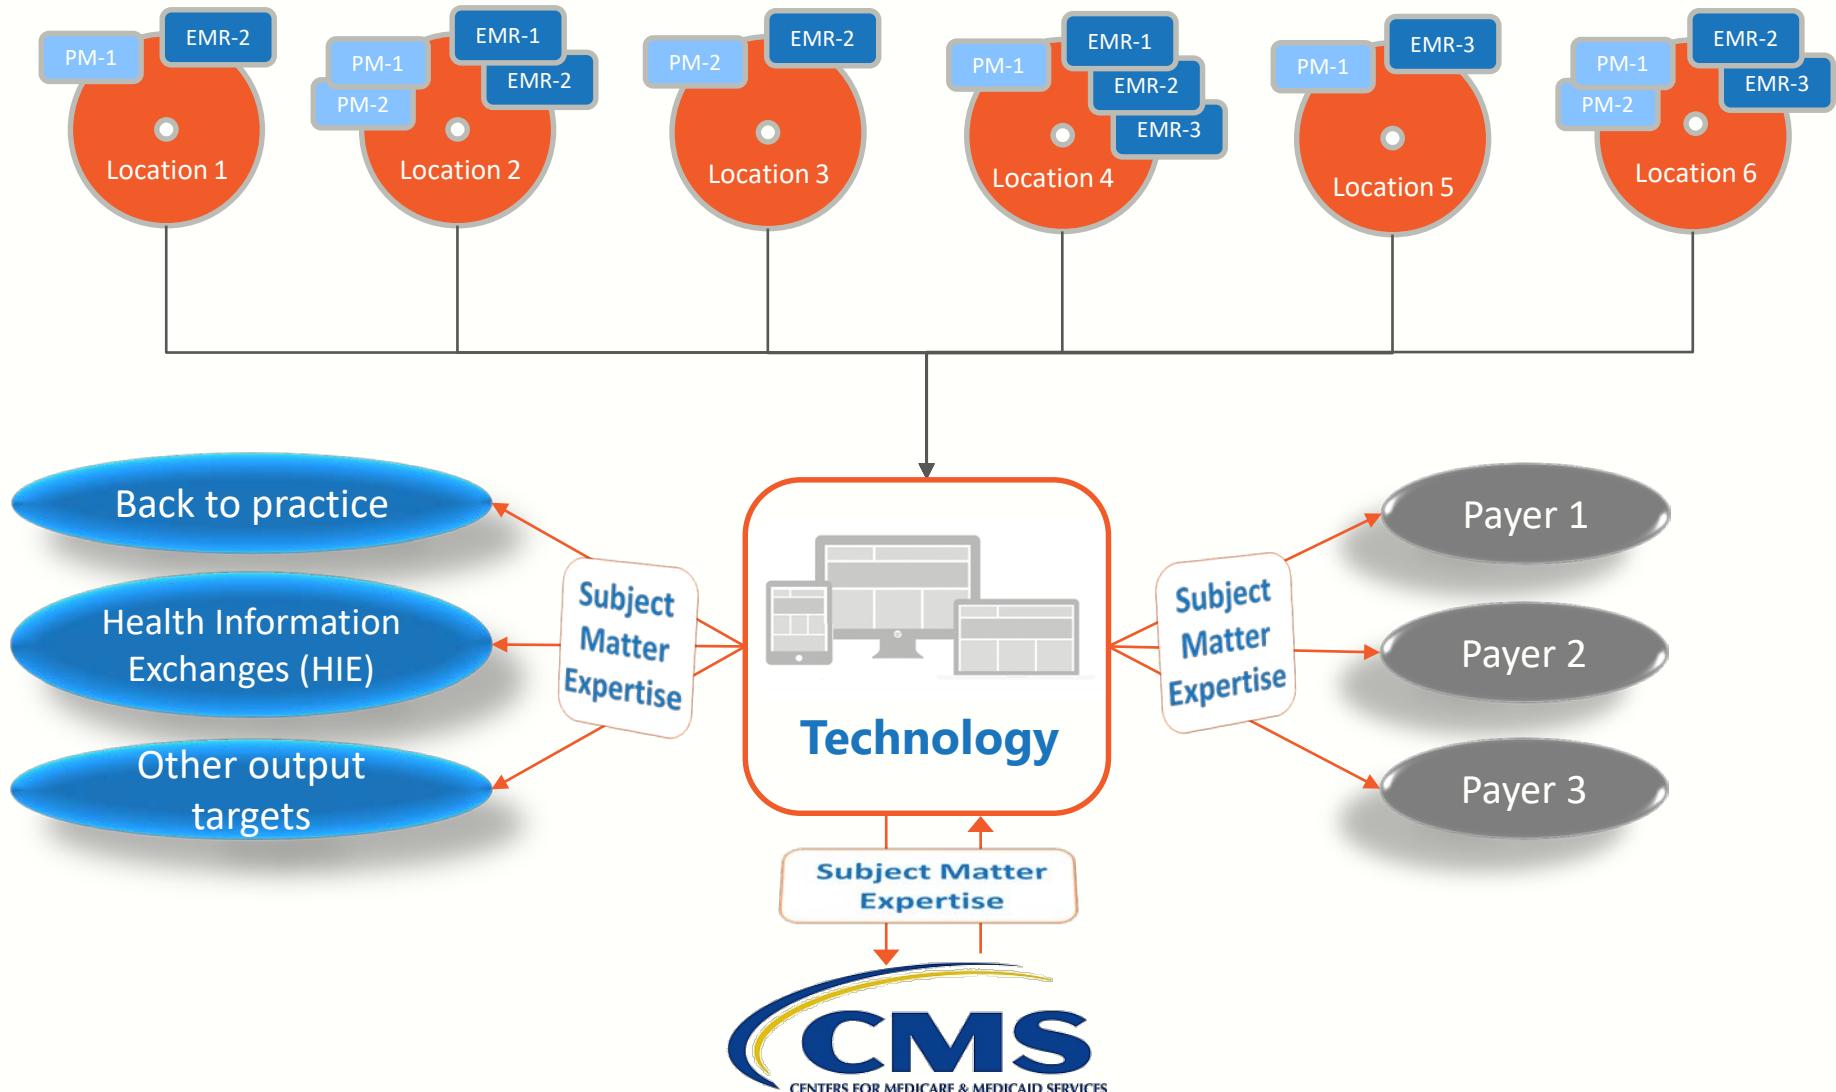

# Why Health Information Management is vital

*There isn't a point of patient contact that doesn't pass through your EMR or PM system!*

## Example

# Why more than just technology is vital

# Building Blocks for a Sound Quality Care Strategy

## Required

### Get In The Game

New Requirements Change the Game

**New factors are changing the requirements for comprehensive quality performance and reporting on an annual basis and under every model:**

## Priorities

### Hit The Gas

Growing Importance of Practice Characteristics

**Practice characteristics play a chief role in developing a quality reporting strategy**

## Optimization

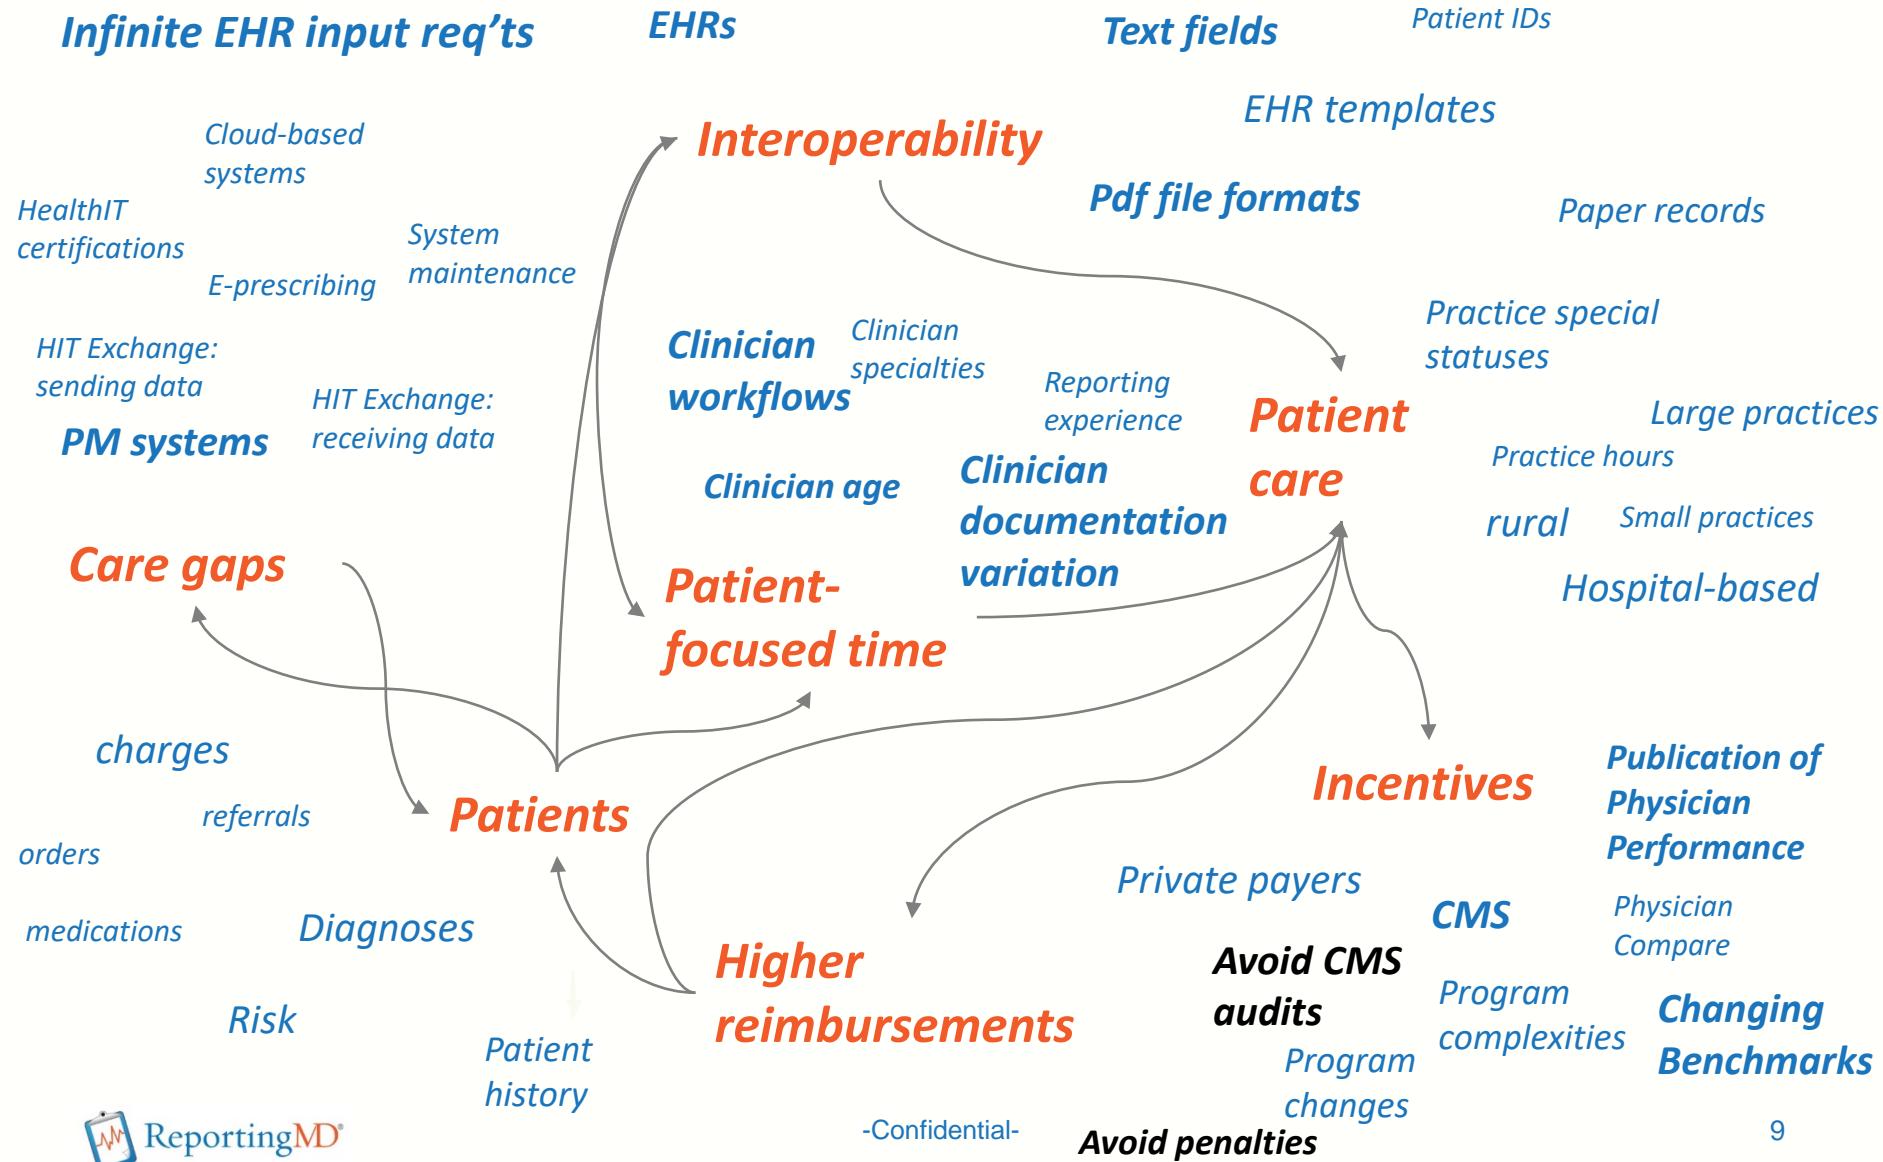

### Maximize The Model

Pull all levers to optimize performance

**Program complexity creates more ways to optimize performance, close care gaps, and secure higher reimbursements**

# “But, Doctor... Where did you put the ejection-fraction readings?”

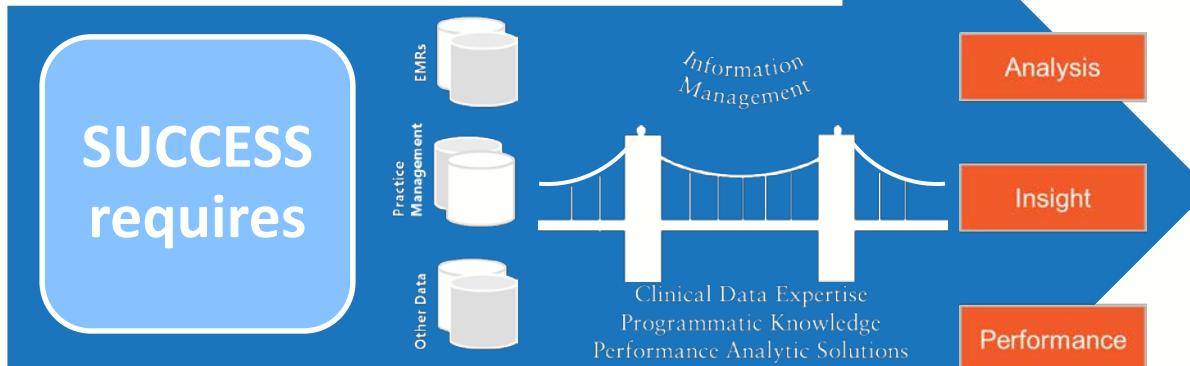

# Bottom Line

Benefits of Value-based Care:

- Better outcomes
- Lower cost
- Increased reimbursements
- Reduced burden

... pass through all parts of an organization
